DESCRIPTION OF DRAWINGS

Fig 1. Entrance/method of access

Illustrates how a user would access and use of platform. Using a computer keyboard the user starts by logging-in to the PLATORM on the Internet.

Fig 2 The Platform

The platform is the program that the user logs-in to that stores the input, and provides memory for retrieval, handles functions and task.

The user creates his/her account, password, make their initial deposit, enter a game to play, store game information, make transactions, review, study game tactics, up-date and manage their account, log - out.

The program will the information (on users account, storage, history), and is the portal to the Internet game.

Fig 3 illustrates where the platform resides

The Internet is where the platform will take the user once they have completed making their selection in the platform. Which means they have selected a game to play, and they have made the arrangement via their account to enter the game of choice.

CONCLUSION, RAMIFICATIONS, & SCOPE

The E-Commerce Role Playing PLATFORM provides a forum for game playing that has yet to be broached by the video game or Internet industries.

Not only will this format of game play appeal to players of all ages, races, & sexes; it will single-handedly provide a forum for interactive, non-aggressive game play for members of the World Wide Web community.

The PLATFORM has the potential for wide-scale distribution to numerous companies with the ability to give the public new material in a highly competitive genre.

This format can be used to propagate imagination, encourage intelligent spending habits via player maintenance of the "game account," and generate revenue for companies while simultaneously contributing to the positive connection of people around the world.

The market for the E-Commerce Role Playing Platform is universal and can be translated into any number of languages for the entertainment and the development of non-aggressive competition in other countries.
